

Brief Interview with Ahmed Al-Jumaily (Editor)

Pulmonary & Respiratory Medicine

1. How many years have you been associated with the current research?

20

2. What is the research topic you are working on now?

Pressure Oscillation as a tool for lung Therapies.

3. What are attributes for a quality article?

Novelty, originality and practical (clinical) contributions to the field.

4. Do you have any research funding (NIH or other national funding) now?

Yes

5. When did you become an editor of OMICS Journal?

Don't remember

6. Where can the journal find the maximum scope in terms of niche?

Clinical research, biomedical applications, pharmaceuticals

7. What is your greatest career accomplishment?

I have supervised more than 90 postgraduate students (PhD and Masters) from 34 countries in 5 Continents. I have served the biomedical industries for over 20 years.

8. How does the published scientific content assist the potential researchers?

It leads them to discover what is not published.

9. What is the purpose of serving as an editor?

Help the journal to move in the right direction with strong profile

10. Do you have any patents?

1 pending.

11. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Yes.

12. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?

Possible, if time permits.

13. How would you define your experience with OMICS Group?

ok

14. Your opinion on conducting Editorial Board meetings at related Conferences?

Good, helps team work

15. Would you recommend OMICS to your friends or colleagues?

Yes

16. How do you differentiate Journal of Pulmonary & Respiratory Medicine with other journals in the field?

I normally publish in journals of biomedical engineering and physiology.
