

Brief Interview with Dr. Andréa Pereira (Editor)

Journal of Biodiversity, Bioprospecting and Development

1. How many years have you been associated with the current research?

Three years

2. What is the research topic you are working on now?

Leishmania and Trypanosoma in wild and domestic animals as well as phylogeny and biogeography of these two agents

3. What are attributes for a quality article?

A quality article should have primacy at:

1 - Theoretical Rigor A consistent theory is essential so you can make any relationship and analysis of empirical standpoint.

2 - Methodological Rigor - the methods used must be appropriate to the research question and objectives and must be justified by the authors

3-Contribution of value - creating "new knowledge" based on existing knowledge in the area of work.

4- Finally has an impact (to stimulate new empirical and theoretical work are often cited and open possibilities for research in new areas)

4. Do you have any research funding (NIH or other national funding) now?

Yes I have

5. When did you become an editor of OMICS Journal?

February 2014

6. Where can the journal find the maximum scope in terms of niche?

7. What is your greatest career accomplishment?

My greatest achievement would be a successful researcher in the area where I work and have a brilliant career in teaching and research.

8. How does the published scientific content assist the potential researchers?

When permits new works, opening possibilities for research in new areas

9. What is the purpose of serving as an editor?

Serving as an editor is an important source of learning for my growth as a researcher and the evolution of my work, the reviews are also great opportunities for my development as appraiser.

10. Do you have any patents?

No, I'm not

11. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

No, I haven't. This is the first time.

12. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?

Yes, I intend to.

13. How would you define your experience with OMICS Group?

Is a unique, interesting and rich experience, which has given me the opportunity to grow professionally, in addition to stimulate and develop exchanges between researchers, teachers, students and practitioners in the field of science professionals, and the opportunity to contribute to the production and socialization of knowledge in the society.

14. Your opinion on conducting Editorial Board meetings at related Conferences?

I believe it is of paramount importance to consolidate the position of the journal, such as controlling the flow of articles adopting the same international standards used in the most prestigious journals to review papers, setting deadlines for all steps of the process, among others, which arouse greater interest among readers and growing flow of article submission by researchers.

15. Would you recommend OMICS to your friends or colleagues?

Yes, most certainly

16. How do you differentiate Journal of Biodiversity, Bioprospecting and Development with other journals in the field?

The journal presents itself as a link between information competence and the question of the quality of scientific publications which leads to have ONE DIFFERENCE IN QUALITY OF SCIENTIFIC PUBLICATIONS.
