

Brief Interview with Dr. Pietro Scicchitano

Journal of Cytology & Histology

1. How many years have you been practicing and/or performing research?

I have been practicing and/or performing research within the last 7 years .

2. What is the research topic you are working on now?

My recent research topics: cardiovascular diseases, endothelial function evaluation, neurological-gastrointestinal-pulmonary-kidney-gynecological and chemical fields and their relationship with cardiology, vascular biology and atherosclerosis development, cardiovascular prevention, non-invasive instrumental assessments, echo-color Doppler.

3. What makes an article top quality?

The scientific design of the article, the aim of the study and its novelty within the scientific community topics, its impact on patients' quality of life and mortality/morbidity rates.

4. What are the qualities you look for in an article?

Novelty of the study, scientific design, writing style, clarity of the contents.

5. Do you have any research funding (NIH or other national funding) now?

No at the moment.

6. When did you become an editor of OMICS Journal?

Since August 2013.

7. What is your greatest career accomplishment?

Member of the directive nucleus of the Italian Society of Cardiology working group on Hypertension, rehabilitation and prevention; member of three European Society of Cardiology working group.

8. How does the research published percolate through to practitioners?

Thanking the clarity of the data and the manuscript the published researches can be widespread to practitioners.

9. What is the purpose of serving as an editor?

To widespread knowledge in the scientific community by filtering the data coming from the authors in relation to their clarity, novelty and scientific protocol.

10. Do you have any patents?

At the moment I have no patent.

11. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Yes I wrote an Editorial which is in press and a work of mine has been approved for publication in OMICS journal.

12. Do you plan to contribute any editorials or papers to OMICS Journals in the near future?

I surely plan to contribute to OMICS journals with a manuscript in the near future.

13. Do you have any trouble with OMICS Journals in the past?

I have no trouble with OMICS journals.

14. Would you recommend OMICS Group to your friends or colleagues?

I have already recommend OMICS Group to my friends and colleagues who were delighted to contribute to the journals and are eager to continue to contribute.

15. How do you differentiate Journal of Cytology & Histology with other journals in the field?

Journal of Cytology & Histology is a young journal and deserves the potentials to become a leader journal in its fields. It offers a great opportunity to vary within the scientific fields of medicine and to improve knowledge thanking its dynamic editorial staff.
