

2020 Conference Announcement on Explore the Concept of Tissue Repair, Restore & Regeneration

Nidhin Eldo

Aster medcity hospital, Cochin, Kerala, India, E-mail: dnidhin.eldo@asterhospital.com

“[International Conference on Genetic Disorders and Gene Therapy](#)” hosted by conference series with the theme, “Current Research and futuristic challenges in genetics” was successfully executed during May 18-19, 2020 Auckland, New Zealand. The conference offered a unique opportunity to investigators across the globe in order to meet, explore, network and perceive new scientific innovations. The conference received commendable and active participation was received from the Editorial Board Members of OMICS Group Journals as well as from the global scientists, Professors, Academicians, Researcher Scholars and students from diverse fields of [Genetic Disorders](#) and [Gene Therapy](#).

A number of methods are under development for treating genetic disorders, including a inherited (eg, monogenic/Mendelian) conditions and acquired conditions such as cancer and infections. This topic reviews molecular techniques that can be used to alter the sequence or expression of a gene, including gene therapy, gene editing, and gene silencing.

- Genetic Diseases
- Genetic Testing
- Genetic counseling

The conference commenced with the presence of worthy Keynote forum and among the notable ones, few are listed below.

“Single point mutation of a gene creates mirror-image animals in fresh water gastropod by Reiko Kuroda, Tokyo University of Science, Japan”

“The centers of premelton signals, the beginning and ends of genes by Henry M Sobell, University of Rochester, USA”

Conference series is organizing "[International Conference on Genetic Disorders and Gene Therapy](#)" and is going to be held on May 18-19, 2020 Auckland, New Zealand.

The conference is going to cover the entire field related to Genetic Disorders, Genetics and Human Gene, latest research and findings. The Conference will provide a platform where research scholars and students will be able to gain knowledge about new, innovative research and findings from the eminent Scientist, Researchers and Professors.

The conference highlights of Transplant Science 2020 are as follows: [Human Genetics](#), [Gene Editing](#), [Stem Cell in Gene Therapy](#), [Pediatric Geneticist](#), [Gene Therapy](#), [Genetic Disorder](#), [Genome Editing](#), [Nano Therapy](#), [Clinical Trials on Cell & Gene Therapy](#), [Biomarkers](#), [Regulatory and Safety Aspects of Cell and Gene Therapy](#)
