Awards Content- Thermodynamics 2020

Nicolas Fray

Laboratoire Interuniversitaire des Systèmes Atmosphériques, UMR CNRS, France, E-mail: Nicolas.Fray@lisa.u-pec.fr

Conference Series LLC LTD invites you to find a path to carve out a near-to-perfect platform where people like you and us can get together, stand together and discuss the possibilities in the field of Thermo Dynamics and its related aspects.

Thermodynamics 2020 has been finalized to take place during **July 22-23, 2020** in **Vancouver, Canada** and will initiate its journey towards its aim of unifying people from different corners around the globe with the theme *"Empirical Evidence for Innovations towards Thermodynamics"*.

As the premier event, we have developed a program with your interests in mind. We have not only increased the number of opportunities for you to network with colleagues from across the world but also introduced more focused sessions that will feature cutting-edge presentations, special panel discussions, and livelier interaction with industry leaders and experts.

Expert Level:

This Expert Level Scientific Award is given to the renowned scientific personnel who have contributed their services with a passion, dedication and commitment for the human development and distinguished experts who have made significant, sustained and continuing contributions in the field of Thermodynamics. It is considered as the most esteemed award of the entire conference. His/Her contribution could be long-term, cumulative or single, particularly insightful, experimental, applicable, or interpreted ideas. This prestigious award could be given for the nominee who had demonstrated significant, independent contribution in their selected area of research with a min of 20+years of experience in Thermodynamics and productively engaged in respective leading edge technology. The achiever of the award must have completed MD or PhD, or equivalent. The recognition of the award will be taking into consideration for the independence of thought, originality and significance of discovery, and impact on his/her area of research. Eligible nominees can upload their Research

Portfolios online with their latest 10 publications, landmarks obtained during their research.

Professional Level:

The Professional Level Researcher Award is given to a scientific personal who had made a significant contribution with the commitment towards the knowledge development in the field of Thermodynamics research. This Research Award could be given for the nominee who had demonstrated significant, independent contribution in their selected area of research with a min of 10+years of experience in Thermodynamics and productively engaged in respective leading edge technology. The nominee has to attain recognition by professional societies, community, organizations or other external bodies. The achiever of the award must have completed MD or PhD, or equivalent. The recognition of the award will be taking into consideration for the independence of thought, originality and significance of discovery, and impact on his/her area of research. Eligible nominees can upload their Research Portfolios online with their last few publications, landmarks obtained during their research.

Scholar Level:

The Scholar Level Researcher Award recognizes innovative contributions grounded in relevant research field that raise important research questions, offer original contributions to the field, and are supported by compelling visual and textual evidence. The nominee(s) may work in any type of organization: corporate, government, nonprofit, or academic background who have completed/submitted his/her PhD thesis in the field of <u>Thermodynamics</u> research. Eligible nominees can upload their Research Portfolios online with their last few publications, landmarks reached during their research.

Women Scientist:

Women Scientist Award highlights major contributions by Female scientists/researchers to <u>Thermodynamics</u> research. The pursuits of the award are inspiring role models for the future generations of women in science. The nominee must be recognized internationally for outstanding contributions in the field of <u>Thermodynamics</u> research. The nominee(s) may work in any type of organization: corporate, government, nonprofit, or academic with 10+ years of experience in the field of <u>Thermodynamics research</u>. Eligible nominees can upload their Research Portfolios online with their last few publications, landmarks reached during their research.

Outstanding Speaker:

This award acknowledges the best speakers, who have the capacity to engage a diverse variety of audiences, captivate them with their style and deliver a message that conveys their expertise. A speaker can present their projects, strategies, and schemes that have been implemented by them to improve long-term excellence in

Best Poster Presentation:

This award recognizes the best poster presentation given during the course of an event to encourage students and recent graduates to present their original research.. Recipient of this award will be selected by the judge of the poster session. An award winning poster will be evaluated on presentation content and clarity, innovativeness of approach, communication criteria and scientific aspects. It will also be based on layout, insights, analysis and results description. The awardee will be felicitated after the completion of poster session. Eligible nominees can upload their Research Portfolios online with landmarks, reached during their research.
