

International Conference on Pure & Applied Chemistry scheduled during October 19-20, 2020 at Tokyo, Japan

Kirk Johnson

Professor, Kasetsart University, Thailand, E-mail: kirkjohnson834@gmail.com

Chemistry is the branch of Science that is involved in the study of composition, properties and reactivity of matter. Chemistry is called the central science because it is involved in every other science as a foundation for example it is part of botany as plant chemistry; it is part of ecology as the formation of ozone. Catalysis is a part of chemistry that deals with catalysts which accelerate the chemical reaction without being consumed and the catalyst can be recovered at the end chemically unchanged. The term catalysis was first employed by the Swedish chemist Jons Jacob Berzelius in 1835. The application of catalysts to industrial processes was undertaken in the 19th century. The catalyst will provide an alternate route in which the chemical reaction can be undergone with an accelerated rate, whereas without the catalyst reactants will lack activation energy for the chemical reaction to occur.

The “*World Chemistry Conference*” hosted by Conference Series was held during **October 14-15, 2019** in Seoul, South Korea was successfully completed which offered a unique opportunity for Scientific Researchers and Analysts across the globe to meet, network, and perceive new innovations. Benevolent response and active participation was received from the Analytical expertise researchers, Professors, Scientific communities, Delegates, Directors, CEO's, deans, students, PhD scholars, those who involved in this successful event.

The conference was initiated with the honorable presence of the Keynote forum. The list includes:

- Weerasak Songoen | Kasetsart University | Thailand
- Ryo Nakajima | Hiroshima University | Japan

This event has provided a platform for collaboration among colleagues, vendors, and academia to reveal

new innovations, solutions, ideas, and emerging technologies in Chemistry.

Conference Series is now organizing "[International Conference on Pure & Applied Chemistry](#)" scheduled during October 19-20, 2020 at Tokyo, Japan with a theme of “**Exploring the Research Challenges and Advancements in Applied Chemistry**”. We invite you all to Applied Chemistry 2020 to have incredible associations with the effective professionals.

The main scope and importance of the conference is to bring all Professionals to one roof and share their experience in discussing the innovative trends in the field of Applied Chemistry.

Thomas

Program Manager | Applied Chemistry 2020
