### Why is it Japan?

Japan Patients Assistance Programs (PAPs) have emerged in an effort to help patients who are missing fitness insurance or prescription drug coverage to get the medicinal drug they need. These programs are supplied by means of pharmaceutical companies to grant free or low cost prescription capsules to patients who are struggling from serious illnesses.

With developing focus on the need to shield marine ecosystems, the enterprise is transferring its awareness to aquaculture. By 2014, many [Cancer drugs](#) have been raised on farms rather than catching in seas. The marketplace for industries has reached maximum level.

### Why Tokyo?

Global Summit on [Oncology & Cancer](#) is going to be held in Tokyo, Japan. Tokyo is often referred to as a city, but is officially known and governed as a "metropolitan prefecture", which differs from and combines elements of a city and a prefecture, a characteristic unique to Tokyo. The Tokyo Metropolitan Government administers the 23 Special Wards of Tokyo (each governed as an individual city), which cover the area that was the city of Tokyo. Tokyo has numerous outlying islands, which extend as far as 1,850 km (1,150 mi) from central Tokyo. Because of the islands' distance from the administrative headquarters of the Tokyo Metropolitan Government in Shinjuku, local sub-prefectural branch offices administer them.
