

Young Researchers Forum - Young Scientist Awards at Vascular Biology & Medicine 2020

Dr. Anwar Eman Ibrahim

Professor, Alexandria University, Egypt, E-mail: emandhm@yahoo.com

Prestigious Award for Young Research's at **Vascular Biology & Medicine 2020**- Discovering New Exploration in **Vascular Biology** field.

Vascular Biology & Medicine Conference Committee is glad to announce "2nd Annual Conference on Vascular Medicine" during **September 18-19, 2020** in **Dubai, UAE** by focus on the theme: "Exploring the new heights of excellence in vascular Biology and Medicine".

Vascular Biology & Medicine 2020 developments are maintaining their momentum. Vascular Biology & Medicine Conference program delves into strategic discussions.

The field of vascular medicine is also known as angiology. It deals with preventing, diagnosing and treating vascular and blood vessel related diseases. Vascular Medicine centres around the non-intrusive determination and treatment of all issues including the circulatory framework outside of the heart. These issues may include:

- Arteries, which convey blood from the heart to the tissues
- Veins, which convey blood, back to the heart
- Lymphatic system, which transports lymph fluid back to the circulation

Commonly encountered conditions in the field of Vascular Medicine include:

- peripheral arterial disease/ Claudication - blockages in the leg arteries; may cause pain with walking
- carotid artery stenosis - blockages in the neck arteries; may lead to a stroke
- renal artery stenosis - blockages in the kidney arteries; may contribute to high blood pressure and/or chronic kidney disease
- abdominal aortic aneurysms (AAAs) - a bulging of the aorta that may cause it to rupture
- venous problems such as deep venous thrombosis (DVT) and chronic venous insufficiency
- Raynaud's, vasculitis, lymphedema, and other less common vascular conditions

Cardiovascular Medicine is the across the board supplier of cardiovascular pleasantries joining in the identification, the executives, treatment and anticipation of a few cardiovascular ailments. The specialty of cardiovascular medicine emphasizes on the diagnosis and treatment of diseases of the heart and blood vessels or the vascular system, which include: coronary artery disease, heart rhythm disorders, heart failure, congenital heart defects, heart valve disease, heart muscle disease, and disorders of the vascular system including the aorta and other vessels.

Cardiovascular Engineering rouses novel systems and innovative headways in the fundamental getting, treatment and utilizations of the cardiovascular ailments and analysis. Novel Contributions plot new thoughts and applications in cardiovascular mechanics, cardiovascular and vascular imaging, gadgets and instrumentation, cardiovascular help, cardiology applications and indicative techniques, vascular unions and counterfeit hearts, cardiac electrophysiology techniques, hemodynamic monitoring and measurements, computer modelling and drug delivery systems.

Non-Invasive Diagnosis: Vascular Imaging

Vascular ultrasound remains the foundation for the non-obtrusive conclusion of vascular illness. Non-invasive vascular ultrasound laboratory for Vascular Medicine offers a comprehensive range of vascular ultrasound services including:

- Non-Invasive Flow Studies (NIFS)
- Carotid ultrasound
- Abdominal aortic ultrasound
- Venous and arterial ultrasounds

Vascular Medicine Cardiologists - Vascular drug cardiologists represent considerable authority in treating the veins and corridors outside of the heart, which may mess dissemination up in the arms and legs, normally called fringe vascular ailment.

Vascular illness is brought about by aggravation and shortcoming of the veins and supply routes – and by the development of greasy stores in the veins.

Prevention of vascular disease:

1. Don't smoke.
2. Get regular exercise -- at least 30 minutes, four to six times per week.
3. Stick to a healthy low-sodium, low-fat diet.
4. Take medications if you need them to help lower your cholesterol and lower your blood pressure.

That diet includes, of course, heart-healthy foods such as nuts, fish, whole grains, olive oil, vegetables and fruits, but don't be afraid to treat yourself occasionally with a glass of red wine or a piece of dark chocolate. This list as a guide to create meals and snacks with a healthy focus. Just a few simple swaps could make a big difference for your cardiovascular health.

Vascular Biology & Medicine 2020 Young Scientist Awards:

Vascular Biology & Medicine 2020 Conference Committee is intended to honour prestigious award for talented Young researchers, scientists, Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, Junior faculty in recognition of their outstanding contribution towards the conference theme. The Young Scientist Awards make every effort in providing a strong professional development opportunity for early career academicians by meeting experts to exchange and share their experiences on all aspects of Vascular Biology & Medicine.

Young Research's Awards at Vascular Biology & Medicine 2020 for the Nomination: Young Researcher Forum - Outstanding Masters/Ph.D./Post Doctorate thesis work Presentation, only 25 presentations acceptable at the **Vascular Biology & Medicine 2020** young research forum.

Submit your proposals: **Vascular Biology & Medicine 2020**

Last date for Initial application December 30, 2019 – \$399

Last date for Initial application January 30, 2020– \$499

Last date for Initial application February 28, 2020 – \$599

Benefits:

Young Scientist Award recognition certificate and memento to the winners

- Our conferences provide best Platform for your research through oral presentations.
- Learn about career improvement with all the latest technologies by networking.
- Young Scientists will get appropriate and timely information by this Forum.
- Platform for collaboration among young researchers for better development.
- Provide an opportunity for research interaction and established senior investigators across the globe in the field
- Share the ideas with both eminent researchers and mentors.
- It's a great privilege for young researchers to learn about the research areas for expanding their research knowledge.

Eligibility:

- Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, Junior faculty with a minimum of 5 years of research experience
- Presentation must be into scientific sessions of the conference.
- Each Young Researcher / Young Scientist can submit only one paper (as first author or co-author).
- Age limit- Under 35yrs
- All submissions must be in English.

Vascular Biology & Medicine 2020 provides best platform to expand your network, where you can meet scientists, authorities and CROs from around the world. It's your time to grab the opportunity to join **Vascular Biology & Medicine 2020** for promoting your research article and to facilitate prestigious award in all categories. In this fame, we look forward for your contribution and astonishing dedication to make our **Vascular Biology & Medicine 2020** more successful.
