

## Young Researchers Forum - Young Scientist Awards Biomarkers Summit 2020

Gery Rifano

Professor, Diponegoro University, Indonesia, E-mail: geryrifano@gmail.com

We are delighted to welcome you to the prestigious "[15th Global Biomarkers and Clinical Research Summit](#)". Biomarkers 2020 brings together experts from all aspects to meet and discuss the future of Biomarkers & Clinical Research, importance in today's world to thrive and survive with better health. The conference will be held on September 17-18, 2020 at Vienna, Austria, which includes prompt keynote presentations, oral talks, poster presentations, and exhibitions. We are optimistic that you will appreciate this upcoming Conference's Scientific Program. Theme: Enlightening the Vision on Personalized Medicine & Advanced Prospects in Clinical Research.

Biomarkers 2020 is the first event in the world to put together a diverse and global combination of academic and industry experts, scientists and decision-makers to share their knowledge, experience, and research innovations in the medicine & health sector. [Biomarkers 2020](#) is the world's leading science conference that brings together all respected academics in the field of Biochemistry, academics in clinical research, professors to exchange ideas on the state of research & technology. Papers will be presented in the form of symposia, plenary sessions & posters including the scientific and clinical material that was carefully selected by the Review Committee. The Conference helps in providing the ideal forum to stimulate establish collaborations and ideas.

### ***Prestigious Award for Young Research's at Biomarkers Summit 2020***

Biomarkers Summit Conference Committee is intended to honour prestigious award for talented Young researchers, scientists, Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, Junior faculty in recognition of their outstanding

contribution towards the conference theme. The Young Scientist Awards make every effort in providing a strong professional development opportunity for early career academicians by meeting experts to exchange and share their experiences on all aspects of Clinical Research

The Young Research Award is an initiative with the intention of supporting young researchers (students) in their quest to advance the frontiers of Medical & Clinical Research Development

The attendees can build up the knowledge through exclusive sessions and panel discussions on latest innovations in Clinical Research & Vaccines, and Drug Development.

- Poster presentations by [Young Researchers](#)
- Keynote forums by Prominent Professors, Doctors
- Open Innovation Challenges
- Lectures from renowned speakers
- Novel techniques to benefit your research
- Global Networking sessions with 50+ Countries

### ***Participation***

Participation is open to anyone who sees him / herself as a 'young' researcher, wishes to share research ideas and (preliminary or mature) results with their peers and seeks an opportunity to be inspired and inspired by research paths. Ph.D. applicants, young researchers at any point of their work (including undergraduate students), young researchers on the paths of industry research are all most welcome to take part. We also explicitly invite Ph.D. candidates and young researchers to present their work at the Biomarkers Summit 2020.

### ***Topics***

- Area of interest includes all aspects/topics of Biomarkers & Clinical Research based, as such
- Biomarkers

- 
- Molecular and Genetic Biomarkers
  - Biomarkers in Drug discovery and Drug Development
  - Careers in Clinical Research
  - Digital Biomarkers
  - Genomic Biomarkers in Clinical Development
  - Biomarkers for Cancer Diagnosis
  - Clinical research and Medical Case Reports
  - Genomics and Proteomics
  - Diagnostic and Therapeutic Biomarkers
  - Advancements in Biomarkers
  - Biomarkers in Personalized Medicine
  - Drug Discover and Development
- Create a forum for young researchers to collaborate.
  - The forum will provide forums for collegial contact with other [young researchers](#) and senior researchers developed around the globe.
  - Interact with colleagues and advisors and share ideas.
  - Young researchers have the opportunity to learn about their peers ' work areas in order to improve their potential as multidisciplinary researchers.

### ***Criteria for Selection***

- Showcase oral presentations of your work.
- Read about career development and the new technology and research resources in your profession.
- This website will provide accurate and timely information to those conducting research and those using research and gaining from it.
- Create a forum for young researchers to collaborate.
- The forum will provide a venue for collegial contact with other young researchers and senior researchers from around the globe.
- Interact with colleagues and advisors and share ideas.
- Young researchers have the opportunity to learn about their peers ' research areas and improve their potential as multidisciplinary researchers.
- Distribute information effectively and encourage educational and career benefits.
- Present your work by means of oral presentations.
- Read about career development and the new techniques and developments in your field of [Biomarkers research](#).
- This website will provide important and timely information to researchers and those who use and benefit from research

### ***Benefits***

- Certificate of appreciation and remembrance for recipients of the [Young Scientist Award](#).
- Our conferences provide the best oral presentation forum for your study.
- Learn how to develop your career by networking with all the latest technologies.
- This Forum will provide relevant and timely information to young scientists.
- Collaboration forum for improved development among young researchers.
- Provide the opportunity to interact with research and develop senior researchers in the field around the globe.
- Exchange thoughts with leading researchers as well as mentors.
- In order to expand their scientific understanding, it is a great privilege for young researchers to learn about research areas.
